Custom Profiles

ELBEX Corporation is a diverse and progressive rubber and silicone extruder dedicated to quality and innovation. ELBEX offers a wide range of standard and customer extruded profiles in a variety of engineered material compounds. The standard profiles shown in the product categories to the left represent only a portion of ELBEX's range.

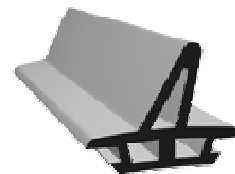

The cornerstone of our custom capabilities: we handle difficult geometry and material requirements. This differentiation is based upon [multi-market application experience](#) and [in-house tooling & fabrication](#).

Profile engineering is designed for manufacturing to ensure maintenance of critical tolerances and dimensions with the goal of meeting all application fitness parameters. Strong SPC and Quality Assurance systems are in place to ensure application performance and customer satisfaction.

Continuous improvement is an ELBEX core value in every aspect of operations. Our goal is to support customer success in a [variety of markets](#) with proactivity and understanding of customer needs. ELBEX strives to provide predictability and reliability while maintaining robust cost avoidance / reduction programs.

Challenge us today with your tough requirements. [Send us your custom profile requirements](#) and you can count on ELBEX to deliver optimum product on time, every time.
